Helping Children & Adolescents after a shooting – advice for parents/carers

- Try and keep routines, including attending school, as normal as possible – these give security & predictability.
- Limit exposure to TV and the news
- Be honest with them – share as much information as they are able to understand and cope with
- Listen to their fears and concerns
- Reassure them that the world is a good place to be but there are people who do bad things
- Parents and carers must think about and deal with their own stress responses first
- They may regress and want to be with you and need you more
- Rebuild and reaffirm relationships and attachments – spend time together.

Remember its'ok to ask for help and support
